

Awareness Story

Discovering Heart Care Connect

Mr. Ravi, a 45-year-old IT professional, had always been concerned about his family's history of heart disease. Although he hadn't experienced any symptoms himself, he wanted to take preventive measures to maintain his heart health.

One day, while attending a health awareness event in his city, he came across a brochure about **Heart Health India Foundation: Patient Support Group**, a program focused on heart health education and support. Ravi decided to register for the Awareness group to learn more about preventive care.

Registration Process

Mr. Ravi accessed the Heart Care Connect website and filled out the Patient Registration Form

- He provided his basic details, including his
 - 1.name,
 2. age,
 3. gender,
 4. contact number,
 5. Email ID
 6. City and state

He selects,

- "No" for having been diagnosed with a heart condition.
- "No" for having undergone any heart-related procedure or surgery.
- "No" for experiencing symptoms requiring immediate medical attention.
- "No" for undergoing rehabilitation or post-surgery care.
- "Yes" for looking for general heart health awareness and preventive tips.

After submitting the application, the file is sent to waiting where the staff will verify and add them to the group

Joining the Awareness Group

After submitting the form, Ravi received a confirmation message along with resources tailored to the Awareness group. He was provided:

A link to join a WhatsApp community of like-minded individuals focused on heart health education.
